

CIVIL ENGINEER HAMILTON LOCATION

Make this your career defining role! We're looking for an ambitious individual who is keen to make their mark in this expanding company.

Maven Associates is a market leader in Civil Engineering and Land Development with a wealth of industry knowledge and expertise. Due to growth and increased volume of work, we are looking to take on a Junior - Intermediate Civil Engineer in our Hamilton office.

Maven has a philosophy of putting people first and is committed to delivering the very best to its' clients and people. This includes creating a culture that enables employees to succeed in their professional career. With like-minded experts around you, you'll find it's a supporting and enriching environment where you can add value and experience long term growth. Being a multi-disciplinary company, we offer employees learning and development opportunities within the various aspects of land development.

What we are looking for:

- Someone who self-motivated and a quick learner with 5-7 years' experience
- Familiar and capable with using AutoCAD/ Civil 3D software.
- Familiar with construction contracts specifically NZS3910
- Comfortable working onsite conducting inspections
- A relevant tertiary qualification (BE, NZDE, BEngtech)
- A high standard of written and verbal communication skills
- A confident/ professional approach to all manners of work

What we have to offer:

- Market competitive remuneration that will adjust to increased responsibilities
- Support to attain professional registration (CPEng)
- The chance for rapid career growth within the business
- Great work culture and the opportunity to work on an array of projects

This role is the perfect an ambitious Civil Engineer with 5-7 years' experience, who is looking to fast track their career.
