

INTERMEDIATE - SENIOR CIVIL ENGINEER HAMILTON

Join a dynamic and progressive company - we're looking for an ambitious individual who is keen to make their mark in this expanding company.

Maven Associates is a market leader in Civil Engineering and Land Development with a wealth of industry knowledge and expertise. Due to growth and increased volume of work, we are looking for an Intermediate - Senior Civil Engineer in Hamilton to lead a large project.

Maven has a philosophy of putting people first and is committed to delivering the very best to its' clients and people. This includes creating a culture that enables employees to succeed in their professional career. With like-minded experts around you, you'll find it's a supporting environment where you can add value and experience long term career growth. Being a multi-disciplinary company, you will get a breath of exposure to all aspects of Civil Engineering.

The successful applicant must be ambitious, self-motivated, technically capable, and able to work independently.

What we are looking for:

- A relevant tertiary education (BE, NZDE, BEngtech)
- A minimum of 3 years' previous experience required in NZ
- Local experience in the Hamilton area
- Experience using the latest design software in AutoCAD/ Civil 3D.
- Understanding construction contracts specifically NZS3910
- Comfortable working onsite conducting inspections and managing contractors
- A high standard of oral and written communication skills
- A confident/professional approach whilst dealing with clients

What we have to offer:

- Market competitive remuneration that will adjust to increased responsibilities
- Support to attain professional registration (CPEng)
- The chance for rapid career growth within the business

This role is the perfect an ambitious and confident Civil Engineer with a proactive nature of their work.

If you are interested in this role, please submit a covering letter and CV to careers@maven.co.nz
